

# International Project Management MSc

## UK Postgraduate degree in France (Full Time)

Master of  
Science

100% in  
English

15 months  
duration

Central  
Paris

**Study a  
UK  
degree  
in  
France**

This intensive course is for people who want to use high-level project management skills to make a difference to the performance of global businesses.

Study with us for a master's degree in International Project Management and you will have the opportunity to develop problem-solving skills, as well as the practical and innovative project management tools needed to become a business leader in many industries. You will learn how to control complex projects which enable organisations to compete on the global market.

The course prepares you to sit for a range of professional qualifications including PRINCE2, AGILE, PMP, SCRUM and APM.

Learn the British way while immersed in French life.

What our staff say:

“

**Understanding the complexities of international business and managing projects across multiple countries is essential in today's changing world. Being ready to hit the job market with such practical skills is a real plus. Employers want employees who are ready to pull up their sleeves and get working.**

Deirdre Mathelin, MSc Programme Co-ordinator, formerly Engineering Projects Director for CEVA (NASDAQ: CEVA)

# Course Structure

## SEMESTER 1 (September to December)

- ◆ International Business Strategy and Portfolio Management
- ◆ Applied International Project Management
- ◆ Fundamentals of Marketing, Communication and Negotiation
- ◆ People Management and Cross-Cultural Leadership

## SEMESTER 2 (January to April)

- ◆ Advanced Project Management – Professional Approaches and Practices
- ◆ Project Management Simulation
- ◆ Managing Emergency, Risk and Safety in Projects
- ◆ Business and Management Research Methods

## SUMMER BREAK (May to August)

- ◆ Optional Internship

## SEMESTER 3 (September to December)

- ◆ Dissertation for International Project Management

## Best methods and tools

This course is underpinned by the core competencies at the heart of APM and PRINCE2, and covers the key knowledge areas of the prevailing project management bodies of knowledge.

You will be trained to use industry standard tools such as MS Project for project planning, and SPSS and NVivo for research.

## Get certified

Prepare to sit for a range of professional qualifications such as a PRINCE2, AGILE, PMP, SCRUM and APM.

Go for PRINCE2® certification during your second semester.

## Professional opportunities

You could choose to pursue a career in project management itself, or use your skills in a range of other careers, such as in operations, finance, logistics, facilities or marketing.

You could apply to join a project team at a large UK or international organisation, become a business consultant, or maybe even start your own business.

## How you'll be taught

Our teaching staff have many years' experience working in different industries as well as teaching international students, so expect the highest standard of teaching.

Teaching focuses on practical application in an international context.

Besides lectures and seminars, you will have opportunities to attend guest lectures, participate in workshops, go on international field trips and more.

## Professional experience

We know you will be keen to apply the theory and skills that you learned during the first two semesters. You will be able to carry out internships during the summer months with the support of our school.

European and non-European students are permitted to work in France.
